## INFORMATION REPORT

CD NO.

COUNTRY

East Germany

DATE DISTR. 1 April 1954

SUBJECT

Electric Power Production in East Germany

NO. OF PAGES

25X1

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18. SECTIONS 793 AND 784, OF THE U.S. CODE. AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UMAUTHORIZED PERSON IS BROHIBITED BY LAW THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

- 1. Since the Russian SAG's return to German administration on 1 January 1954, Kombinat Espenhain has taken the first place among the East German plants producing electric power. In 1953, while still under SAG administration, the Espenhain enterprise produced 1,665,258,000 kilowatt hours. The second largest producer of electrical power in East Germany is VEB Kombinat Otto Grotewohl, Boehlen, which in 1953 produced about 550,000,000 kilowatt hours.
- 2. In this connection, it should be noted that about 60 percent of the total electric power produced in East Germany comes from enterprises under the Production Area for Chemistry in the Ministry for Heavy Industry and not from plants under the Production Area for Power in the same Ministry. However, the bulk of the electric power produced by chemical factories is used up within these enterprises.
